Our world needs ideas! As one of the world’s most research-intensive chemical companies, we have been developing leading solutions for numerous sectors – from construction to photovoltaics and cosmetics to rubber – for over 100 years. We have a global presence with production sites on three continents and 14,600 employees from 70 nations.

We are looking for Data Scientist Interns, who are interested to explore the data and develop Machine Learning models for insights in Competitive Intelligence and Supply Chain areas.

Here is the summary of tasks

- Design statistical and machine learning models for getting desired insights out of the data that is being collected.
- Experience in analyzing structured and unstructured data
- Able to utilize analytical algorithms - Customer Insights, Predictive Analytics, Text Mining, Segmentation and Data Visualization
- Proficient with at least one scripting and one programming language, e.g. R, Python

This paid internship will give you a great opportunity to see real-world challenges. You will be teaming with an experienced Data Scientist and will be given the opportunity to understand the business processes and present to top executives. We are looking to hire interns for Summer 2019 and the hiring process will be very quick.

Applications and inquiry should be sent to: RAJ POLANKI, Sr. Manager – IT Analytic Services, raj.polanki@wacker.com
