Petram Data is searching for an experienced Engagement Manager to consult on new projects, develop strategy, and have direct oversight over a team of data scientists and data analysts. The Engagement Manager manages key client projects. Engagement management responsibilities include the coordination and completion of projects on time within budget and within scope. Oversee all aspects of projects. Set deadlines, assign responsibilities, assist, direct and lead their team. The manager will monitor and summarize progress of project and prepare reports for upper management regarding status of project.

The successful candidate will work directly with clients to ensure deliverables fall within the applicable scope and budget. He or she will coordinate with other departments to ensure all aspects of each project are compatible. The goal will be to ensure that client relationships are strong, profitable and enduring.

To succeed in this role, you’ll need to communicate well and multi-task under tight deadlines. Experience managing business client relationships is an asset in this position. If you’re a team player and a problem-solver, we’d like to meet you.

As an Engagement Manager you will be responsible for...

- Understand client point of view, and advise/guide them to successful engagement outcomes.
- Manage client expectations with regards to project scope, cost, quality, team and outcomes
- Establish common understanding between the different stakeholders (client, delivery team and leadership)
- Manage consulting projects in a fast-paced agile environment partnering closely with the product team, data scientists, data architects and engineers, web development teams, QA teams, and other business and technology stakeholders.
- Manage and positively lead a team of consultants, data scientists, data analysts & engineers across multiple clients & projects
- Prepare project charter and project plan in collaboration with various stakeholders. Track and manage the plan
- Proactively share project progress, status, and highlight risks and issues
- Prepare, enhance, and/or maintain requirements and design documents
- Define program scope, goals and deliverables that support business goals in collaboration with leadership team
- Work side-by-side with other team Project Managers to ensure projects remain on track across the business. Trusted to take over any project and operate effectively. - TL: don't understand what this means.

Experience you have....

- Bachelor’s degree in a related field
- 5+ years experience in consulting or project management
- 5+ years leading teams on consulting technical projects
- Experience with SQL, Apache Hadoop, and big data systems and tools
- Understanding of statistical techniques and strong working knowledge of data science algorithms including decision trees, probability networks, association rules, clustering, regression, and neural networks.
- Demonstrated capability of working with cross-functional teams with excellent interpersonal skills and capability to manage relationships with multiple stakeholders with conflicting priorities
- Critical thinking skills to actively and skillfully conceptualize, apply, analyze, synthesize, and/or evaluate information
- Communicating complex analyses clearly
- Excellent client facing communication skills
- Understanding of current product trends and technology innovations
- Proficient in MS Project, Excel, PPT

Why Petram Data

At Petram, we are passionate about our work and committed to greatness. Leveraging our collective genius as a team to innovate for the future; we’re looking for people committed to learning who are self-motivated, problem solvers inspired to solve the big problems our customers bring to us. Revealing insights in data to empower our clients is one side of the coin, inspiring teammates to thrive is the other.

Petram is dedicated to growing and upholding a culture of inclusion and continued learning. The diversity of our team is what makes Petram thrive and build the best solutions for our customers. As we build our team, we encourage potential candidates to consider their unique contribution in terms of languages spoken, veteran’s status, education, opinions, culture, ethnicity, race, sex, gender identity and expression, nation of origin, age, religion, sexual orientation, beliefs, disability, and color.
